PROJECTS

NBTrade – Company Website (WordPress) [🔗](#)

06/2024 – 08/2025

Web Developer

- **Overview:** Developed and optimized the company's WordPress website to strengthen branding and support marketing activities.
- **Tech Stack:** WordPress (custom theme/plugin), PHP, HTML, CSS, JavaScript, cPanel
 - Designed and optimized the website interface to enhance brand identity and user experience.
 - Improved on-page SEO and site performance with lazy loading and resource optimization.
 - Customized the Admin dashboard to enable non-technical staff to easily publish posts, news, and products.
 - Ensured responsive design across devices; integrated Google Analytics, Yoast SEO, and social media plugins.
 - Automated the blog publishing workflow to strengthen marketing and brand promotion efforts.

Book Store Web Application [🔗](#)

08/2025 – 09/2025

Full-Stack Developer – Personal Project

GitHub: [github.com/OneSun02/book-store](#) [🔗](#)

- **Overview:** Built a personal project simulating an e-commerce web application for online book sales, with a focus on UI/UX, SEO, and security.
- **Tech Stack:** Next.js, TypeScript, Tailwind CSS, Prisma ORM, Node.js, PostgreSQL, Vercel
 - Designed and implemented the entire e-commerce application from frontend to backend using Next.js and Prisma + PostgreSQL.
 - Implemented user authentication and authorization, including sign-up, login, password reset, and JWT-based security.
 - Designed and developed reusable UI components, responsive layouts, product catalog/detail pages, search, and filtering functionality.
 - Built shopping cart, user profiles, and order management with real-time updates.
 - Optimized frontend performance using Tailwind CSS and Next.js.
 - Set up CI/CD pipelines and deployed the complete application on Vercel.

Personal Web Portfolio

09/2025 – 10/2025

Full-Stack Developer – Personal Project

GitHub: github.com/OneSun02/web-portfolio 

- **Overview:** Built a personal portfolio website to showcase skills, projects, and professional experience.
- **Tech Stack:** HTML, CSS, JavaScript, FastAPI, Gemini API
 - Designed and built a responsive UI using HTML, CSS, and JavaScript, optimizing frontend performance with lazy loading and asset minification.
 - Developed and integrated a Gemini API chatbot via FastAPI, securely managing API keys in the backend to support interactive Q&A.
 - Designed AI prompts to ensure complete and accurate responses based on personal information.
 - Set up CI/CD pipeline and deployed the complete application on Render.
